

HOW ARE YOUR VENDORS PROTECTING YOUR DATA?

As the cost of data breaches continues to grow, organizations must do everything to protect their data from cyberattacks. Vendor Assessments can deliver critical insight into potential vulnerabilities, allowing you to stop problems before you're in the headlines.

Without the proper supplies, many organizations aren't equipped to deal with third party risks like these.

It's time to clean out the manual vendor assessments and stock up on **purpose-built software** that automates your vendor assessments.

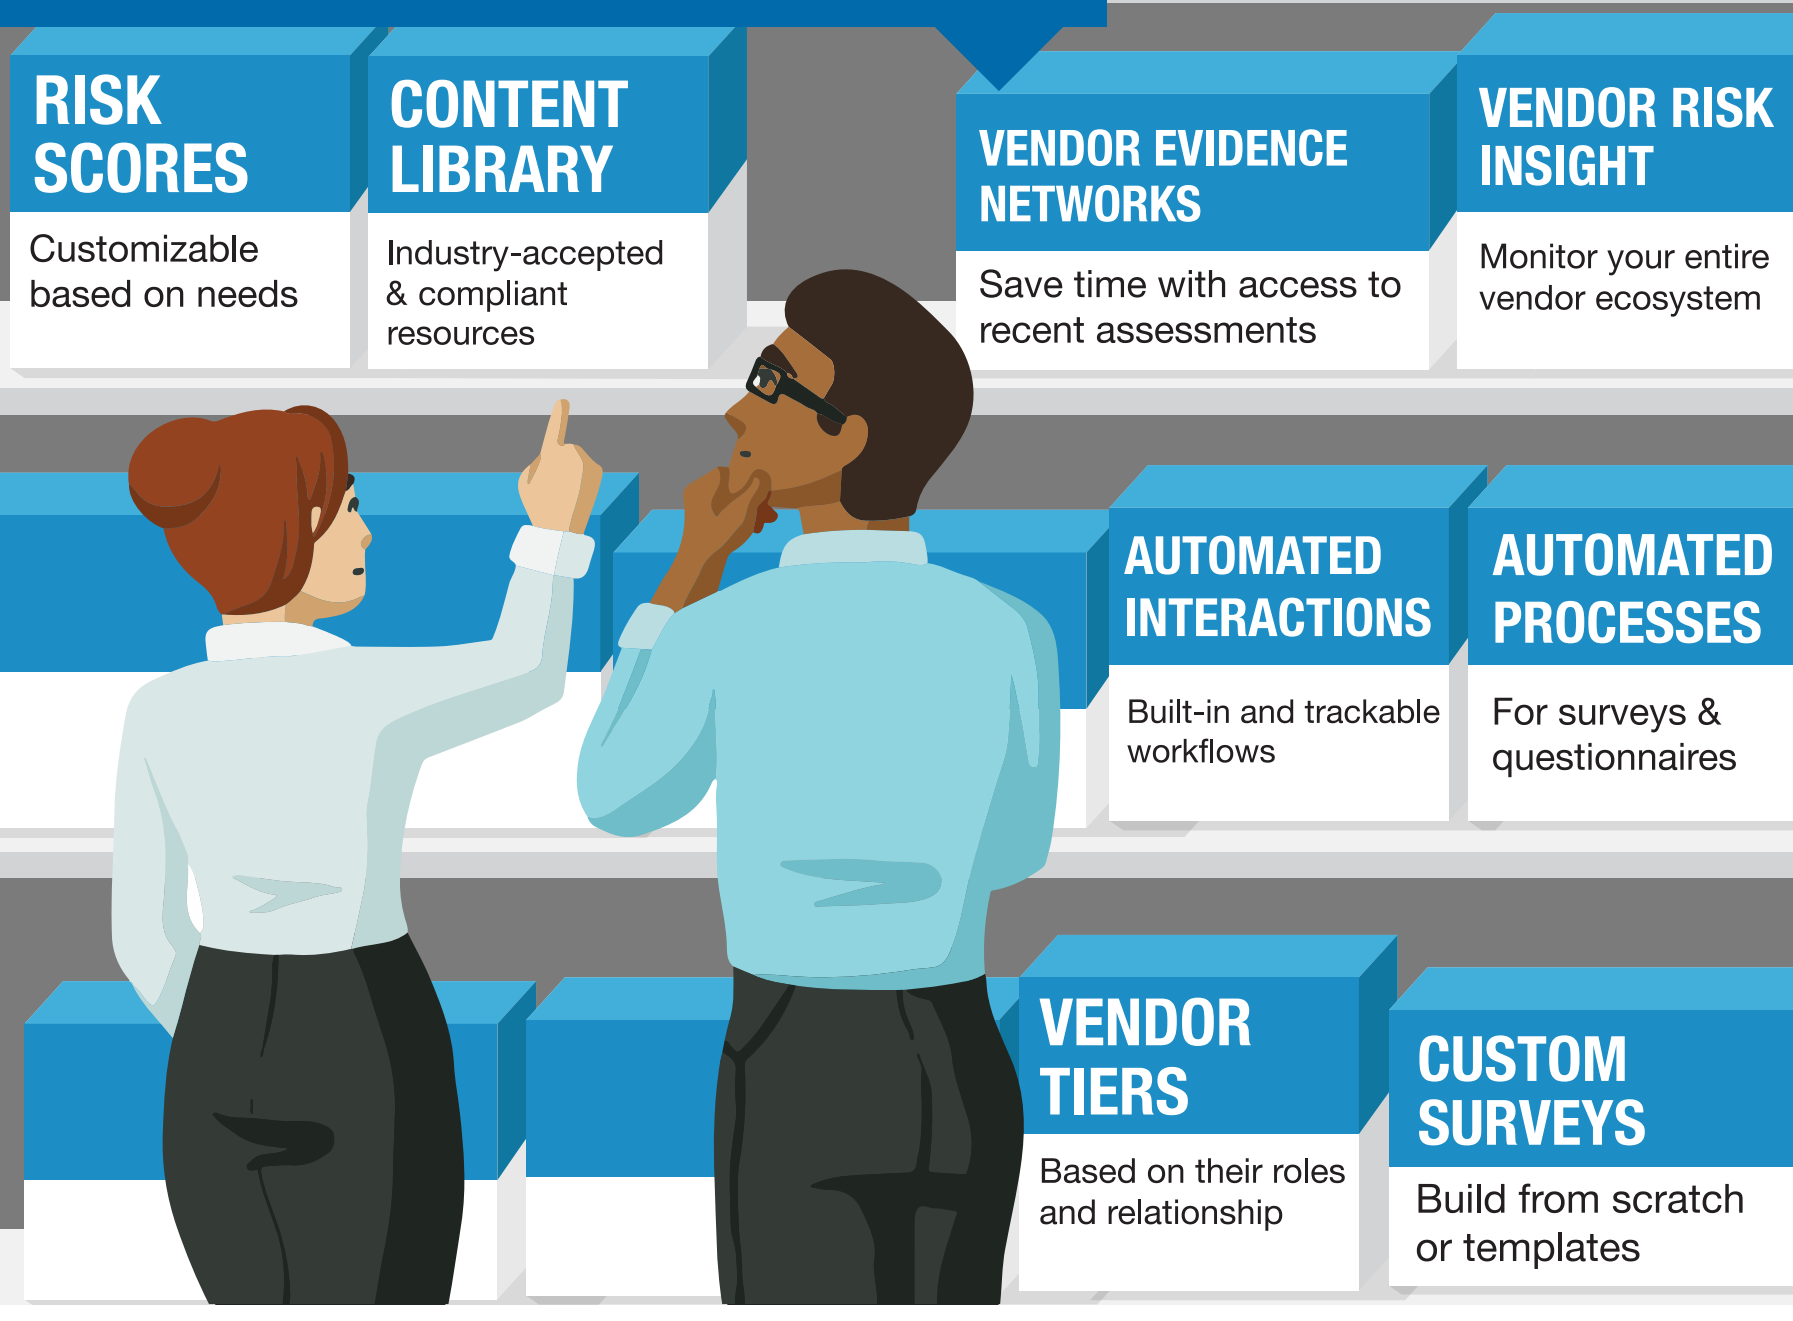

Shop for a **complete solution** that works for both your small vendors as well as your large enterprise vendors.

Automating the Vendor Assessment Process is a critical first step towards a holistic third party risk management plan.

Some vendor assessment solutions only have a few of the necessary components, causing you to miss out.

Compromising on your vendor assessment software can leave your organization open to risk.

Only one solution has it all.

Prevalent's Vendor Risk Management Platform is the only dedicated software that helps you manage every step of your vendor risk management process.

Assess and Manage your entire vendor ecosystem while significantly reducing the time and cost of performing risk assessments.
