

TPRM Jump Start

Quickly onboard and assess your vendors
for business resilience

Prevalent TPRM Jump Start provides an easy, affordable way for any size organization to build a structured third-party risk management program and see actionable results in 30 days or less.

Zero to TPRM in 30 Days

Prevalent Jump Start is an ideal solution for security and risk leaders who need to quickly launch a third-party risk management (TPRM) program to ensure business and supply chain resilience. Jump Start makes it easy to centrally onboard and manage your vendors, as well as baseline the risk each poses to your operations. It also delivers a fast time-to-value, with an included services package that can help you build a structured TPRM program in about 30 days.

Unlike lower-end solutions, Jump Start is an affordable, high-velocity launch pad for building a mature, process-driven TPRM program. Because Jump Start is part of a comprehensive and proven third-party risk management platform, it's simple to scale your assessment, analysis and reporting capabilities as your organization's needs evolve over time.

Key Benefits

- Gain visibility into who your vendors are and how much risk they pose to your business
- Eliminate spreadsheets to reduce manual labor, errors and duplicate work
- Generate inherent risk reports that clarify where to focus your vendor assessments
- Get on the path to a mature, programmatic and process-driven TPRM program

Vendor Discovery

Discover vendors with an automated onboarding process

Inherent Risk Scoring

Quantify the inherent risk vendors pose to your business

Vendor Tiering

Tier and categorize vendors based on the criticality of their service

Automated Vendor Assessment

Assess against best-practice industry frameworks to benchmark vendor risk

Clear Risk Scoring

Report on risks through a clear risk score

Remediation Recommendations

Mitigate vendor residual risk with built-in remediation recommendations

Jump Start Discover

Know Your Vendors > Quantify the Risk

Jump Start Discover enables you to centrally manage vendors and calculate their inherent risk. Even if you don't require assessments of every vendor, Discover makes it easy to organize them all in one place and get a quick inherent risk score to inform vendor tiering and profiling.

- Build a centralized vendor repository via API and bulk upload capabilities
- Schedule, track and quantify risk with a standardized inherent risk assessment
- Report on inherent risk and identify remediation options with a central risk register
- Accelerate onboarding and training with straightforward, step-by-step guidance

Jump Start Assess

Assess Your Vendors > Mitigate the Risk

Jump Start Assess enables you to survey your top vendors, score their risk, and gain remediation guidance. You get everything in the Discover package, plus the ability to evaluate vendor cybersecurity, privacy and business resilience practices using a library of industry-standard assessments or your own customized survey.

- Schedule, track and quantify vendor risks from a library of controls-based assessments
- Reveal the impact of residual risk remediations with a library of compliance and industry-specific reports
- Simplify communications with third parties – out of email and into the Prevalent Platform
- Chart your third-party risk management program with a customized Operations Manual
