

Vendor Threat Monitoring

Validate vendor security controls with continuous cyber, operational, reputational & financial risk intelligence

With vendor-related breaches and supply chain disruptions on the rise, it's critical to not only conduct periodic, internal third-party assessments, but also validate assessment data on a regular basis. Prevalent™ Vendor Threat Monitor complements assessments with frequent, external intelligence reports on potential cyber, operational, reputational and financial exposures to provide a 360-degree view of third-party risk.

Gain a strategic view of vendor-related risk

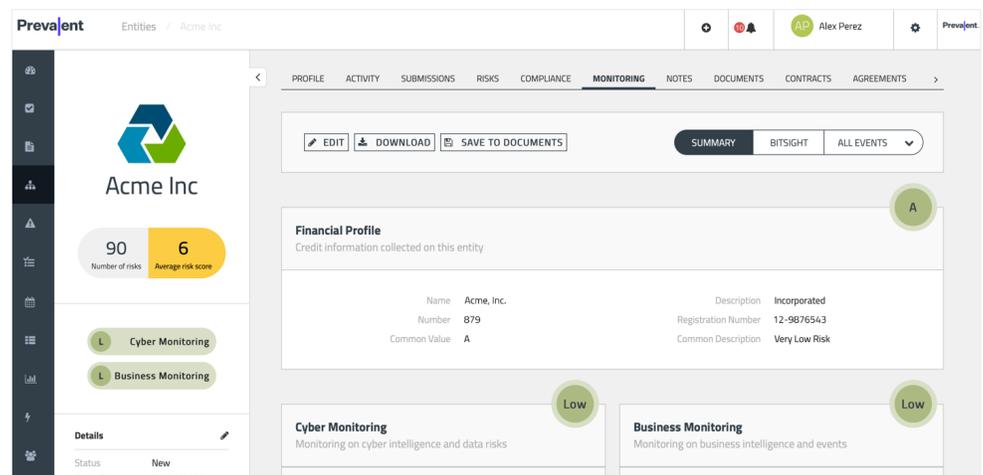

Prevalent Vendor Threat Monitor continuously tracks and analyzes external threats to your third parties. The solution monitors the Internet and dark web for cyber threats and vulnerabilities, as well as public and private sources of operational, reputational and financial information. These insights enable you to validate vendor-reported data for a 360-degree view of third-party risk.

Part of the Prevalent Third-Party Risk Management Platform, Vendor Threat Monitor is integrated with inside-out Vendor Risk Assessment. All monitoring and assessment data is centralized in a unified risk register for each vendor, enabling you to quickly correlate the findings and streamline risk review, reporting and response initiatives.

Key Benefits

- Increase risk visibility by filling gaps between point-in-time assessments
- Make better risk-based decisions with insights into threats, reputation, breaches and financial health
- Augment security controls-based assessments with continuous monitoring
- Accelerate sourcing, RFX and evaluation processes with global vendor intelligence

The Prevalent Third-Party Risk Management Platform combines cyber, operational, reputational and financial intelligence for an optimal view of vendor risk.

Cyber Intelligence

Reveal third-party cyber incidents for 550,000 companies by monitoring 1,500+ criminal forums; thousands of onion pages; 80+ dark web special access forums; 65+ threat feeds; and 50+ paste sites for leaked credentials — as well as several security communities, code repositories, and vulnerability databases.

Operational Updates

Access qualitative insights from over 550,000 public and private sources of operational information, including M&A activity, business news, management and leadership changes, competitive news, new offerings, operational updates, and more.

Breach Event Notification Monitoring

Access a database containing 10+ years of data breach history for thousands of companies worldwide. Includes types and quantities of stolen data; compliance and regulatory issues; and real-time data breach notifications. *(Licensed separately)*

Financial Insights

Tap into financial information from a global network of millions of businesses across 160+ countries. Access 5 years of financial performance data, including turnover, profit and loss, shareholder funds, credit ratings, payment history, bankruptcies, investments, and more. Screen new vendors and monitor existing vendors for informed sourcing decisions.

Reputational Insights

Avoid reputational damage to your company from working with corrupt vendors and individuals by efficiently:

- Screening for adverse media and negative news coverage from 30,000 global sources
- Monitoring global regulatory and legal sanctions from 1,000+ enforcement lists and court filings including OFAC, EU, UN, BOE, FBI, BIS, FDA, US HHS, UK FSA, SEC and more
- Screening for state-owned and government-linked enterprises to avoid conflicts of interest
- Screening against a global PEP database with over 1.8 million politically exposed person profiles, including their families and associates, to fight corruption and bribery

Take the unified approach to third-party risk

Vendor Threat Monitor is part of the Prevalent Third-Party Risk Management (TPRM) Platform, which unifies vendor management, risk assessment and threat monitoring to deliver a 360-degree view of risk. The platform makes it easy to onboard vendors; assess them against standardized and custom questionnaires; correlate assessments with external threat data;

reveal, prioritize and report on the risk; and facilitate the remediation process. If you need extra support, our expert services team can handle everything from onboarding vendors and conducting assessments, to identifying risks and tracking remediation. You skip the hard work and get the intelligence and reports you need to focus on vendor strategy and risk reduction.

“Prevalent gave us the ability to understand the cybersecurity dangers to our company data, employees, and patients.”
