

Vendor Threat Monitoring

Validate vendor security controls with continuous cyber, business and financial risk intelligence

With vendor-related breaches on the rise, it's critical to not only conduct periodic, internal third-party assessments, but also validate assessment data on a regular basis. Prevalent™ Vendor Threat Monitor complements assessments with frequent, external intelligence reports on potential cyber, business and financial exposures to provide a 360-degree view of third-party risk.

Gain a strategic view of vendor-related risk

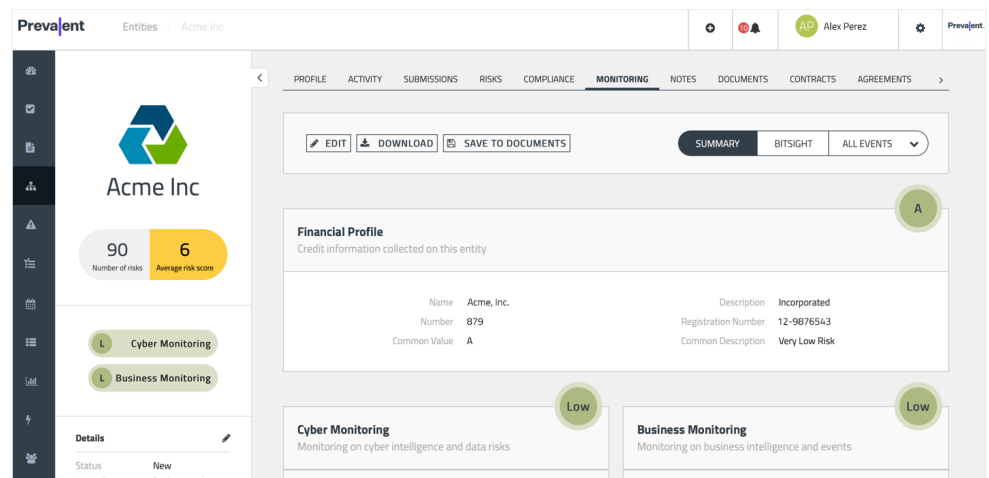

Prevalent Vendor Threat Monitor continuously tracks and analyzes external threats to your third parties. The solution monitors the Internet and dark web for cyber threats and vulnerabilities, as well as public and private sources of reputational and financial information. These insights enable you to validate vendor-reported control data for a 360-degree view of security and compliance.

Part of the Prevalent Third-Party Risk Management Platform, Vendor Threat Monitor is integrated with inside-out Vendor Risk Assessment. All monitoring and assessment data is centralized in a unified risk register for each vendor, allowing you to quickly correlate the findings and streamline risk review, reporting and response initiatives.

Key Benefits

- Increase risk visibility by filling gaps between point-in-time assessments
- Make better risk-based decisions with insights into threats, breaches and financial health
- Augment security controls-based assessments with continuous monitoring
- Accelerate sourcing, RFx and evaluation processes with global vendor intelligence

The Prevalent Third-Party Risk Management Platform combines cyber, business and financial intelligence for an optimal view of vendor risk.

Cyber Intelligence

Reveal third-party cyber incidents for 350,000 companies by monitoring 1,500+ criminal forums; thousands of onion pages, 80+ dark web special access forums; 65+ threat feeds; and 50+ paste sites for leaked credentials — as well as several security communities, code repositories, and vulnerability databases.

Business News

Access qualitative and quantitative insights from over 567,000 public and private sources of reputational information. Uncover financial risks, legal actions, executive leadership changes, violations on OFAC lists, and other indicators of potential cybersecurity or compliance problems.

Financial Insights

Tap into financial information from a network of 365 million businesses. Access 5 years of organizational changes and financial performance, including turnover, profit & loss, shareholder funds, etc. Screen new vendors, monitor existing vendors, and evaluate their health for informed sourcing decisions.

Key Features

AI-Enabled Intelligence Platform

Leverage contextual machine learning algorithms to analyze data from thousands of sources.

Unified Risk Register

Simplify remediation by normalizing monitoring data into tangible risks, and link real-time cyber, business and financial events to assessment findings.

Vendor Risk Scaling

Quickly gauge risk via straightforward numerical scoring and high/medium/low risk scaling.

Rule Automation

Leverage automated playbooks to simplify actions and workflow based on findings.

Centralized Risk Management

Display and track vendor threat monitoring status through a centralized management console.

Advanced Event Filtering

Zero-in on critical risks with filters based on event type, priority, date range, and threat category.

Email Summaries

Receive daily summaries of high-risk events triggered by cyber and business monitoring.

Reporting & Analytics with Machine Learning

Identify, alert and communicate exceptions to common behavior with built-in cyber and business monitoring report templates.

Take the unified approach to third-party risk

Vendor Threat Monitor is part of the Prevalent Third-Party Risk Management (TPRM) Platform, which unifies vendor management, risk assessment and threat monitoring to deliver a 360-degree view of risk. The platform makes it easy to onboard vendors; assess them against standardized and custom questionnaires; correlate assessments with external threat data;

reveal, prioritize and report on the risk; and facilitate the remediation process. If you need extra support, our expert services team can handle everything from onboarding vendors and conducting assessments, to identifying risks and tracking remediation. You skip the hard work and get the intelligence and reports you need to focus on vendor strategy and risk reduction.

“Prevalent gave us the ability to understand the cybersecurity dangers to our company data, employees, and patients.”

- IT Systems Analyst, Global Pharmaceutical Company
